Mosebetsi wa Dirithi, 2022,
Patchwork.

Mosebetsi wa Dirithi (2022) is the most recent body of work by Lebohang Kganye. Each piece is made out of cotton twill cut-out stitched collages, rooted in the curious fascination that Kganye's practice has always had with the black family photo album.

Extrapolating figures of family members from the photo albums, she creates these unique life size works with the help of the fabrics.
